

# Avalere Preparation for Shared Decision-Making Tool: Validation Study Survey Data

**Avalere Health** | An Inovalon Company  
May 2019

# Participants Find the Tool Understandable

---

**Select Whether You Agree/Disagree with this Statement:**  
The information is understandable

● Agree ● Disagree

**These data suggest that the information presented in the tool is understandable and accessible to a diverse group of women with advanced breast cancer**

# Participants Find the Tool Provides an Appropriate Amount of Information

## The Amount of Information Is too Much

## The Length of the Tool Was...

● Agree ● Disagree

● Just Right ● Too Long ● Too Short

 These data suggest that the tool meets the information needs for women with advanced breast cancer

# Participants Find the Information in the Tool Relevant

---

**Select Whether You Agree/Disagree With This Statement:**

The information is relevant to me

● Agree ● Disagree

The data suggest that the tool is relevant to a diverse group of women with advanced breast cancer

# Participants Find the Tool Valuable

## Select Whether You Agree/Disagree with the Statement:

I value the guidance provided in this tool

The tool does not contain information that can help a person with breast cancer prepare for a treatment discussion visit with their doctor

 These data suggest that the tool is valuable to women with advanced breast cancer, especially when preparing for a treatment planning visit

# Participants Generally Would Recommend the Tool to a Friend

How likely is it that you would recommend this tool to a friend or colleague diagnosed with breast cancer?

These data suggest that the tool has a good Net Promoter Score of 50

Net Promoter Score = (Number of Promoters – Number of Detractors) / (Number of Respondents) x 100  
Detractors: 0 – 6  
Passives: 7 – 8  
Promoters: 9 – 10
